## Haiyue Song

| Homepage:          | https://s              | hyyhs.github.io  |                         |  |
|--------------------|------------------------|--|-------------------------|--|
| Email:             | haiyue.song@nict.go.jp |  |                         |  |
| <b>Position</b> :  | Technical Researcher   |  |                         |  |
|                    | National               | I Institute of Information and Communications Technology   | ogy (NICT)              |  |
| Address:           | 3-5 Hika               | ridai, Seika-cho, Soraku-gun, Kyoto 619-0289, Japan  |                         |  |
| Research Interests |                        | Machine translation (MT), including low-resource MT, domain adaptation in MT, multi-modal MT, linguistically motivated MT, and LLMs for MT. Subword, including subword segmentation, encoding, and decoding. |                         |  |
| Education          |                        | Kyoto University   | Kyoto, Japan            |  |
|                    |                        | Ph.D. in Intelligence Science and Technology   | Oct. 2020 – Mar. 2024   |  |
|                    |                        | Thesis: Studies on Subword-based Low-Resource Neuro  | al Machine Translation: |  |
|                    |                        | Segmentation, Encoding, and Decoding   |                         |  |
|                    |                        | Advisors: Sadao Kurohashi, Chenhui Chu   |                         |  |
|                    |                        | TZ . TT ' '.   | IZ I I                  |  |
|                    |                        | Kyoto University   | Kyoto, Japan            |  |
|                    |                        | Master of Intelligence Science and Technology  | Oct. 2018 – Sept. 2020  |  |
|                    |                        | Advisors: Sadao Kuronasni, Chennui Chu   |                         |  |
|                    |                        | Shanghai Jiao Tong University  | Shanghai, China         |  |
|                    |                        | Bachelor of Computer Science and Technology  | Sept. 2014 - July 2018  |  |
|                    |                        | Minor in Japanese  | Mar. 2016 – July 2018   |  |
|                    |                        | Advisor: Li Jiang  |                         |  |
| Honors and Awards  |                        | <b>Research Fellowship for Young Scientists (DC1)</b><br>Japan Society for the Promotion of Science  | Apr. 2021 – June 2023   |  |
| Research Expe      | erience                | Technical Researcher, NICT   |                         |  |
|                    |                        | Advisors: Masao Utiyama, Hideki Tanaka, Raj Dabre  | July 2023 – Present     |  |
|                    |                        | Research on machine translation including MT for data  | a with document struc-  |  |
|                    |                        | ture, low-resource MT, LLMs for MT, and speech trans   | lation                  |  |
|                    |                        | Research Internship, NICT  |                         |  |
|                    |                        | Advisors: Masao Utiyama, Hideki Tanaka, Raj Dabre  | Oct. 2019 – June 2023   |  |
|                    |                        | Research on low-resource machine translation and subword segmentation  |                         |  |
|                    |                        | Research Assistant. Kvoto University   |                         |  |
|                    |                        | Advisors: Sadao Kurohashi  | Nov. 2020 – Mar. 2021   |  |
|                    |                        | Project related to machine translation   |                         |  |
|                    |                        | Internship, Machine Learning Team, LINE  | Tokyo, Japan            |  |

Worked on image segmentation models
